## Entry Level Sign Training

Welcome to JFK247.com Our aim is to help you set up your own sign company or broaden your existing business using the resources of our own experience. We believe that we can save you up to two years of finding out things the hard way. Our concentration is getting you up and running on Vinyl Cutting, Printing, Preparation, Fitting and Wrapping, as vinyl signage is generally the largest proportion of income and work load for any new sign company. It is also the most versatile product for numerous applications.

Our knowledge and advice is all based on our own hard work, training and pure experience. We can offer trade tips and secrets with respect to application, design and fitting, all without compromising quality. And best of all, at realistic affordable rates!

We shall overview all of the types of signs available (as shown on our signs website), and you can even purchase equipment and software direct from us or we will happily advise and recommend where possible.

### How are we different?

Most large manufacturers will gladly sell you equipment and be more than pleased to install it for you! However, after installation you will probably have a few demonstrations and then you are left to your own devices with only telephone support. But not with JFK247.com

We realized that you can obtain training on Software and Hardware, but finding real training on all aspects of the sign industry was extremely difficult. Until now! We have put together a general, entry level training package, encompassing all you need to know in order to set up your business and start generating income swiftly. Or start offering Vehicle Wrapping to your clients. All with the support and resources we have.

### Have you ever asked?

Where do I start?  
What Products are available?  
What equipment do I need?  
What software should I use?  
Which Suppliers are best?  
What Tools do I require?  
How to apply materials?  
Do I need insurance?  
How to promote myself?  
How much can I earn?  
What Products do I want to offer?  
How to fit signage?  
Can I get financial support?  
Where do I source materials?  
What materials do I need?

These and many more questions can be answered on our training course. We hold nothing back with our training and advice, and if we do not know the answers to any specific enquiry, we are sure to know someone who can.

### Training...

On page 3 there is an overview of the one week **Entry Level Training Course** and on pages 5 and 6 an overview of our **Vehicle Wrapping Course**. However, this is very flexible. Our time is spent making sure that your needs are catered for. Our experience shows that students vary on their requirements and we adapt to suit you. Our aim is to build your knowledge and especially your confidence.

### One Week or Two?

We offer a discounted second week of training. It is surprising just how quick a one week course can go. Two weeks provides plenty of time to recap or allow extra time to concentrate on specific areas, as well as repeating tasks so that you are comfortable and confident in what you are doing.

## Entry Level Sign Training

### Training Overview

#### Day 1

- Arrive (morning) and check in to accommodation
- Meet and greet session
- Lunch

### What does it cost?

A one week course costs €850 per person.

A Two week course costs €1300 per person.

Discounts for two or more attendees.

### Additional Costs

The only additional cost would be for bed and breakfast accommodation and travel expenses.

This would apply either way, if we are to travel to you or if you are to travel to us.

If we are to provide the training at your location, then we would expect you or your company to pay for and book our accommodation.

Total Costs shall be invoiced and must be paid prior to confirmation of booking any training dates.

### Dates?

We provide training on an as and when basis and aim to arrange dates to suit you as much as possible.

Payment is required in order to confirm and book training dates.

The above is simply a guide. In essence we spend as much practical time as possible with you on all aspects that you require, with concentration on Vinyl Applications, Design, Fitting and Software. If you have any enquiry, please do not hesitate in contacting us. Thank you.

## Vehicle Wrapping Course

### ***Introduction...***

JFK247.com are pleased to a Vehicle Wrapping Course with a difference. The founder of JFK, Steve Stachini, has run his own sign making business since 1996 and now has a business in Spain. We aim to provide an in depth vehicle wrapping training service for new and existing sign making businesses. Vehicle Wrapping is forever on the increase with growing visual demands from customers. Surprisingly you do not need to have previous experience of vinyl fitting in order to achieve this as a product to offer. We are also prepared to incorporate some basic elements of wrapping in our Entry Level Training services. We can help build your confidence with Vehicle Wrapping very swiftly and train as much on a one to one basis as possible. We will only ever train candidates from one company at a time, which in itself helps to eliminate inhibitions.

### ***Compare Courses!***

The majority of vehicle wrapping courses tend to be over a 2 day period (3 days at most), with at least a third of that time spent in discussion and demonstration. Also, most courses are run with up to 8 attendees, and in one case up to 15. Yet they profess to be crammed with hands on training and one to one tuition. In reality, these courses may provide you with 4-8 hrs of hands on practical fitting and not necessarily one to one tuition. In our opinion this is simply not enough to build prospective wrapping technicians confidence. So when considering a training course, please bear in mind that the cheapest or shortest courses are generally not the most beneficial. Vehicle wrapping is a skill and time spent on training is imperative to ensure that your customers are happy with your fitting quality and that you are confident and happy to vehicle wrap!

### ***How are we different?***

As well as providing the student with all the relevant information required to wrap vehicles, our training course offers as much time as possible, for practical hands on tuition. Building confidence is imperative! Our training course is spread over 5 days (any days of the week) providing plenty of opportunity for trainees to repeat all, or certain aspects of fitting which they may find difficult. This in turn creates a true platform for confidence building. We also insist on having no more than 4 attendees per one week course and advice from us is available for after sales technical and practical support. If training dates suit you better to include working over a weekend period, (i.e. Thursday to Wednesday) this is no problem!

### ***Details...***

Please find attached an over view of our Vehicle Wrapping Training Course. If you have any questions with respect to training or our vinyl products, please do not hesitate in contacting us. Thank you.
